AI/ML-based recommendations for schedules, demand plans, and emergency backfills.

For Everyone

From clinics, hospitals, multi-locations and all kinds of staffing management

**Quick Deployment
Saves You Money**

Ai-Powered

The Challenge Facing Healthcare Institutions in Workforce Scheduling

How to reduce over/understaffing & analyse trends?

How to take personal preferences in scheduling?

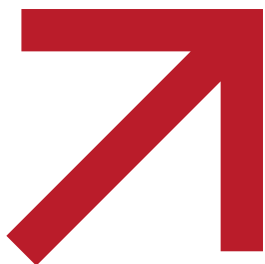

How to ensure regulatory compliance for staffing?

How to link staffing to real patient flow?

How best to deploy resources based on demand?

Even the best EMRs like
EPIC can't address this.

Optime' Goes Beyond — Intelligently Aligning People, Demand, and Care.

Core Problems We Solve

Optimise two biggest costs in healthcare - Staffing and Supplies

Manage **staff scheduling based on real time patient volumes**

Incorporate **individual preferences** in scheduling, improving staff satisfaction

Use **data** to do unbiased planning based on real information

Reduce costs & waste in staffing and scheduling across organisation

Results That Matter

Proven Outcomes at Scale

Private Acute Hospital – 200 Beds

↓ 3.5% Cost per Patient Visit

↑ Staff Utilization Efficiency

UMMC Emergency Department

↓ Turnover: From 19% - 12%

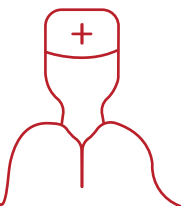

↑ Predictive Readiness in Crises (Ebola, Baltimore Riots, Weather Events)
